Single Gang

1 Module

Magic Series

Ivory Finish

PRODUCT OVERVIEW

The **Bticino / Single Magic Face Plate** is a genuine, single-gang wall faceplate from BTicino's iconic Magic civil series — one of the most widely installed wiring device ranges in residential and commercial electrical systems across the Middle East, Europe, and North Africa. Designed to accommodate one module position, it provides a clean, structured finish for any BTicino Magic series insert, whether a light switch, push button, socket outlet, or keystone jack adapter for structured cabling. Furthermore, it is manufactured from high-quality resin delivering excellent resistance to impact, heat, and everyday mechanical wear in both domestic and light commercial environments. The ivory finish — the signature colour of the BTicino Magic series — ensures full visual consistency across multi-gang installations, making it the ideal choice for renovation, maintenance, and new installation projects where matching existing infrastructure is essential. Additionally, the plate is compatible with the standard BTicino 503 wall box and snaps securely into place for a tool-free, professional finish every time. Consequently, electricians and contractors rely on the Magic series for fast, reliable fitting without compromise on aesthetics. Moreover, the **Bticino / Single Magic Face Plate** is RoHS compliant and compatible with the complete BTicino Magic ecosystem, including switches, dimmers, data sockets, TV outlets, and telephone inserts — a single consistent design platform for any project.

KEY FEATURES

| Single-Gang Magic Series Design

Houses 1 module position. Fully compatible with the entire BTicino Magic series range of inserts — switches, sockets, data, TV, and telephone modules.

| High-Quality Resin Construction

Impact-resistant and heat-resistant resin provides long-lasting durability in residential and light commercial environments.

| Ivory Finish — Perfect Colour Match

Classic Magic series ivory colour ensures seamless visual consistency when matching or extending existing BTicino Magic installations.

| Tool-Free Snap-In Fit

Clicks directly onto the standard BTicino 503 wall box with no tools required for a fast, professional, secure installation every time.

| RoHS Compliant — BTicino Original

Genuine BTicino product from the Legrand Group. Meets all relevant environmental and safety standards. Decades of Italian design quality.

TECHNICAL SPECIFICATIONS

PARAMETER
