

Cisco CBS350-48T-4G Managed Switch – Datasheet

Product Overview

The Cisco CBS350-48T-4G is a business-class managed switch designed for secure, reliable, and scalable wired networks. It provides 48 Gigabit Ethernet ports for high-density access and 4 Gigabit SFP uplinks for flexible backbone connectivity. This switch supports advanced Layer 2 and Layer 3 Lite features, making it ideal for growing SMB and enterprise edge deployments.

Key Features

- 48 x 10/100/1000 Mbps Gigabit Ethernet RJ45 ports
- 4 x 1G SFP uplink ports for fiber or copper connectivity
- Layer 2 and Layer 3 Lite features including VLANs and static routing
- Advanced security with IEEE 802.1X, ACLs, and DHCP snooping
- Multiple management options: Web GUI, CLI, SNMP, Cisco Business Dashboard

Technical Specifications

Feature	Specification
Model	Cisco CBS350-48T-4G
Switch Type	Managed Switch
Ethernet Ports	48 x 10/100/1000 Mbps RJ45
Uplink Ports	4 x 1G SFP
Switching Capacity	104 Gbps
Forwarding Rate	77.38 Mpps
Layer Support	Layer 2 & Layer 3 Lite
VLAN Support	Up to 4096 VLANs
Security	802.1X, ACLs, DHCP Snooping
Management	Web GUI, CLI, SNMP, Cisco Business Dashboard
Power Supply	Internal AC
Form Factor	Rack-mountable, 1U
Operating Temperature	0°C to 50°C
